MÄLARDALEN UNIVERSITY November 3, 2013

Mälardalens högskola
Box 883
721 23 Västerås
+46-(0)21 10 13 00
Sweden

Dear Sir or Madam,

I'm pleased to presente you all my devotion regards to your university. I'm willing an enrollement in the master's programme in Sustainable Energy Systems, in order to enhance my knowledge. What exactly make me discover Mälardalen University is his major impact in education and the high level of his programs. In fact, according to The application statistics for the spring term of 2014, more applicants pick Mälardalen University as their first choice. The design of study programmes at Mälardalen in cooperation with business and society is wonderfull, guaranteeing the high quality of education and making students active and attractive employees.

The revolution necessary for the siecle, and challenges involved nowadays put Mälardalen University (with its campuses in Eskilstuna and Västerås which is a central driving force in the region) at the top position in the knowledge. As a varsity field hockey player, I am very aware of the importance of sustainable energy is so essential for our generation. Your emphasis on "Give our career a head start at MDH" (thanks to your close cooperation with companies and with the public sector in the region and by your distinct environmental profile) is also consistent with the conditions I have expected since many years. Whether on the field learning new drills in the worst weather conditions or patiently working with a new team member, I am most fulfilled when contributing to the team effort. Not only I'll have the opportunity to build a strong network of intelligency, but I'll surely satisfy my love for energy systems.

Thank you for your consideration. I very much look forward to the opportunity to speak with you in person about my interest in this position.

Sincerely yours,

Nonvikan Karl-Augustt ALAHASSA
